- Annually put on presentation for middle school kids about geospatial careers
- Helped map local zoo with GNSS equipment
- Mapping events to help get girls introduced to GIS
- Girl Scouts since 2017
- Lions Club Member since 2018

Statement of Interest:

Hello GISP Community! I am interested in serving on the GISP's Board of Directors. I have been working with GIS since 2010 when I worked as an archeological technician. As the years have gone by, I have moved from a field user to designing databases, to now helping people collect GIS data with precision and accuracy.

I am very passionate about the geospatial community. I believe that it is extremely important to give back to the communities that you are a part of. Since I found out about the GISP certification in 2012 it is something that I have aspired to obtain. Now that I have reached that goal, even with it taking a few years longer than expected, I want to be able to give back to what I worked toward for all those years.

In my experience working in GIS for the time I have it has become evident to me that there are a lot of people who work in GIS and do not understand the fundamentals. I would like to offer my expertise in geospatial technology to help further the GISP certification and the profession. I believe that the exam is a fundamental part of the certification. By continuing to improve it and keeping up with changes to technology it adds additional credibility to the GIS profession. A wise GIS expert once said to me, you can teach anyone to click a button. But it is more important that you understand why you are pushing that button. I would like to help continue that mindset into the next generation of GISP's.,

In my current professional role I have experience with everything from field collection to integrating survey data, GIS data and UAS data. As the profession continues a path of more collaboration I believe that I would be an asset to the board.

I appreciate your time and consideration. I hope to be able to serve the community by being elected to a board position.
