Statement of Interest:

I am passionate about advancing the intersection of geospatial technology, data strategy,

and organizational leadership. With more than two decades of experience across engineering, consulting, GIS, and operations, I have built a career focused on helping organizations make smarter, more informed decisions through technology.

My work has centered on leading multidisciplinary teams, developing technology strategies, and supporting clients across infrastructure, environmental, and engineering sectors. As a long-time GISP and technology leader, I am committed to fostering innovation, mentoring emerging professionals, and strengthening the role of geospatial insight in strategic planning.

I look forward to continuing to contribute to the geospatial and technology communities through collaboration, leadership, and a dedication to continuous learning.
